Team Memo # 32

To All F4 Teams.

As you may know from the Mid-Ohio event, Crawford Composites is working on a chassis modification, which will be made available as soon as it's ready. In the meantime, we are instructing teams to suspend testing till the modification has been made available. We understand some of you may desire to test but we consider it prudent to wait until the modification is available. We will up-date you as soon as we have more information.
