February 20, 2017

Technical Regulation Bulletin
#TRB 001

Minimum Ride Height Rule

Effective immediately, the following rule will be applied:

At any time, at static ride height, no sprung part of the car may be lower than 30mm above a flat plane defined by the contact patches of all four tires. This measurement will be checked with tire pressures at 20psi and driver in the car.

For rules inquiries please contact Mike Wright – Technical Delegate F4 US Championship - by e-mail at:
