

F3 Technical Regulation Bulletin

No: TRBF3-2020-002
Date: January 24, 2020
Subject: Cooling Flow Restriction

Restriction of the flow of fluid or air in any part of cooling systems is not permitted, except for restrictions expressly included in either the homologation or as optional or mandatory updates issued via manufacturer bulletins under SCCA cover.

Notes:

- The above rule will be included in the 2020 F3 Sporting Regulations. This TRB is issued in advance of release of the Sporting Regulations as a courtesy to teams.
- In the event of low ambient temperatures, SCCA and HPD will jointly issue a temporary exemption to protect engines. These exemptions will be issued exclusively via official series communication channels. Verbal authorization from any source will not be valid, consistent with Sporting Regulations section 26.2b.
- Installation of the radio in a manner creating a flow restriction will be interpreted as a violation.
- Relocation or reorientation of existing Type 1 parts to create a flow restriction will be interpreted as a violation of this rule, as well as violating the “manner of assembly” clause of Sporting Regulations section 26.1.
