

F3 Technical Advisory Memo

No: TAMF3-2020-004
Date: February 12, 2020
Subject: Paint or Wrap for Halo

Section 2.7.1 of the FIA Technical Regulations for F3 permits the adding of color, providing that the only function is optical (i.e. visual). This rule will be interpreted to permit paint or wrap on the halo, which the FIA calls the secondary roll structure. Note that the hologram and sticker must not be covered with paint or wrap. The car will not pass technical inspection if the hologram or sticker are covered or removed.
