

FR Technical Advisory Memo

No: TAMFR-2020-035
Date: September 29, 2020
Subject: Weighing Cars and Drivers at Homestead Pre Event Tech

During pre-event tech at Homestead, all cars and drivers must be weighed before they will be issued an event tech sticker to run official practice on Friday.

Please present cars for pre-event tech with fuel pumped completely out. Bring the pumpout hose and a fuel container so the tech staff can verify complete pump out before weighing. Cars will be weighed without fuel, but otherwise ready to run with fluids, radio, seat insert, etc.

If possible, please remove any ballast prior to weighing. Notify the tech staff whether the car has ballast installed. If it does, tell them how much.

Tech stickers will not be issued until the driver is weighed. Drivers can be weighed when the car is presented or separately. Drivers must be weighed in street clothing, but must also bring their complete gear (helmet, HANS, suit, socks, underwear, and shoes) with them for weighing. Drivers may be weighed any time tech is open, until 5:00 pm Thursday.
