

FR Technical Advisory Memo

No: TAMFR-2021-001
Date: January 25, 2021
Subject: Engine Removal or Replacement Reminder

Section 28.7 of the 2021 FR Sporting Regulations remains unchanged from 2020. It requires advance notice, in writing, to the Technical Director prior to removing an engine for routine service, replacement, or power confirmation.

Separately, Section 28.2 governs engine changes during the championship season. While 28.2 does not restrict offseason engine changes, the requirement for notice in 28.7 remains in effect.

For any car to be presented for 2021 annual inspection with an engine different from the one installed when it last competed in a series event, written notice of engine change must be submitted by Friday, March 12. Failure to do so will be reported to the Stewards as a technical violation.

See the following link to fill out and submit written notice:

<https://www.f4uschampionship.com/pages/engine-removal-replacement>

While this link directs you to the F4 web site, the Q&A form there also applies to FR.

Additionally, HPD requires advance written notice prior to shipment of an engine. There is a button at the link above to download the HPD form.

After answering the web site questions, attach your completed and saved HPD form, then hit "Submit" to send forms to both the series and HPD.
