

FR Technical Advisory Memo

No: TAMFR-2021-003

Date: February 4, 2021

Subject: Ligier Bulletin F3 #10 Front Wing Spacer

The attached Ligier bulletin permits optionally removing one specific front wing spacer. The only spacer that may be removed is the 5mm spacer part number 08-13-2013. This is the spacer closest to the wing main plane. The other spacers must remain installed in their original positions. As Type 1 parts, they may not be modified or substituted.

This is an optional upgrade.
