

Formula Regional Americas Championship

F4 United States Championship

Canadian Tire Motorsport Park

28 – 31 August 2025

From	The Stewards	Document	Stewards Memo No. 1
To	All Team Managers	Date	28 August 2025
	All Teams	Time	14:35

The Stewards are aware that the F4 teams routinely scrub one or two sets of new dry weather tires during the optional test sessions for use in the official practice session(s). The Stewards also understand that, due to today's weather, those teams have not had an opportunity to safely scrub a set of dry tires. As a result, the Race Director has proposed, and the Stewards concur, that the requirement to run "scrubbed" tires for the official F4 practice session (as defined in Article 24.5 of the Sporting Regulations) will be modified for the Canadian Tire Motorsport Park event. The F4 drivers may use one (1) new set of dry weather tires for tomorrow's official practice session, and that set of tires does not need to be declared or scanned. Any F4 car that uses more than one (1) new set of dry weather tires for tomorrow's official practice session will be referred to the Stewards for a violation of this memo.

The Stewards note that this memo only applies to F4 and has no effect on the tire rules for Formula Regional.
