

CRAWFORD F4

Bulletin F4.13.06.27 Timing transponder location

1 This is applicable for both types of MYLAPS timing transponder, TRANX260, X2

2 **Location.**

The location for the transponder is on the left hand side, at the lower edge of the chassis and up against the edge of the intrusion panel. Make sure the orientation of the bracket puts the transponder in the correct position. Check with your MYLAPS documentation

3 **Fixing**

Use "Mushroom" lock velcro
Apply velcro to chassis, ensure well degreased before applying. If the car has a wrap, it is recommended to remove the wrap in the velcro area. Apply matching velcro to transponder bracket, again make surface is clean.
Apply bracket to chassis
The power cable can be routed under the chassis and through the brake line access notch in the nosebox
The power connector is in the upper left area of the footbox
