Team Memo

Subject: Gems Software

The data system on the USF4 cars is manufactured by GEMS. The software that will accompany car delivery is the GEMS GDA Standard via USB drive. This will allow teams to see the data as specified by the FIA F4 regulations.

A Pro version is available for purchase from GEMS for those who wish to create/write their own math channels, export to matlab etc. All software versions are available for download from the GEMS website at:

<http://www.gems.co.uk/?content=pages&id=software-downloads>
