

## F4 Technical Advisory Memo

**No:** TAMF4-2020-010

**Date:** April 23, 2020

**Subject:** Ligier Tech Bulletin #30-4.20.2020 Floor Stays

Per the second paragraph of TAMF4-2018-015, once Ligier began delivery of floor stays in 2018, teams were no longer permitted to make their own floor stays (called hanger supports in the 2018 TAM).

Ligier Tech Bulletin #30-4.20.2020, as attached, defines the floor stay kits available from Ligier and shows the only permitted installation location for them. The only modification permitted to the car to install each stay is drilling a single hole in the floor, located as shown in the illustrations in the Ligier bulletin.

The floor stay kits are Type 1 parts and must be used as delivered and unmodified. They are an optional update.
