

F4 Technical Advisory Memo

No: TAMF4-2020-017
Date: June 16, 2020
Subject: Mid Ohio Annual Tech with Form

General Instructions for Annual Tech

Cars and drivers must complete annual tech before running official event sessions, which do not include promoter tests, but do include official practice, qualifying, and races.

Attached is the annual tech form to be used at the Mid Ohio event June 27, 2020. There are minor revisions to the form distributed in February, 2020. The documents referenced are the 2020 F4 US Sporting Regulations and the 2020 FIA F4 Technical Regulations. They are attached.

Please insure that your car will pass all items. If you have any questions, please contact Buddy Fey at 901-210-7245 or bfey@sccapro.com.

Specific Details for Mid Ohio

Upon arrival at the SCCA trailer, please remove the shock cover, engine cover, both sidepods, and the panel covering the fire bottle prior to entering the tech area. Then follow tech staff instructions for distancing.

Due to the number of cars at Mid Ohio and the constraints imposed by Covid-19 protocols, the tech staff will not do followup at team trailers for items that do not pass annual tech. This includes driver and car livery per the Style Guide. If a car does not pass, it will have to return to tech at the SCCA trailer.

Further details and the schedule for annual tech will be released shortly.
