

F4 Technical Advisory Memo

No: TAMF4-2020-026

Date: July 27, 2020

Subject: Jongbloed Front Wheels for Rain Tires at Barber 2020 Event

With Dynamic wheels currently out of stock at Ligier, enforcement of 2020 F4 Sporting Regulations section 26.3.o will be revised for the 2020 event at Barber to allow the use of Jongbloed front wheels, as formerly supplied by Ligier, for rain tires only. This revision is for the 2020 Barber event only. It only permits substitution of the front wheels when using rain tires.

The series will review supply availability during the time between Barber and the following events at Sebring and Homestead. Unless another bulletin similar to this one is issued ahead of those two events, the requirement for Dynamic wheels, both front and rear, rain and dry, will resume for them.

Both the Dynamic and Jongbloed wheels referred to in this memo must be the correct Type 1 parts, as supplied by Ligier, and unmodified.
