

OVERVIEW

In light of the current pandemic situation, please be aware that SCCA Pro Racing, Formula & Automobile Racing Association and Homestead-Miami Speedway are not liable for any potential transmission of illnesses.

This working document will be updated as information and regulations change. Please see event memos for additional guidance and protocols.

Please remember responsible action by all will help ensure we can continue to race. Those who choose not to follow the outlined protocols are subject to ejection from an event. If allowed by local guidelines, only one warning will be given.

First and foremost, if you are exhibiting any symptoms of the COVID-19 virus listed below (even if they are mild), we ask that you refrain from attending any SCCA Pro Racing events.

These symptoms may appear 2-14 days after exposure to the virus:

- Fever
- Cough
- Shortness of breath or difficulty breathing
- Chills
- Repeated shaking with chills
- Muscle pain
- Headache
- Sore throat
- New loss of taste or smell

The virus is thought to spread mainly from person-to-person in the following situations:

- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs, sneezes or talks.
- These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.

EVENT INFORMATION & PROTOCOLS

All participants are required to stop at registration and sign all provided waivers prior to entrance to the facility.

Temperatures will be taken at the entrance gate. Those showing a temperature greater than 100.0 degrees Fahrenheit will be denied access to the facility. Each time you enter the facility, your temperature must be taken. You are required to wear this wristband all weekend, or you will need to return to registration and fill out another waiver.

No more than 10 people are allowed in a garage at the same time.

Masks or face coverings will be required in all areas with the exception of the following locations:

- Personal vehicles
- Under team awning if less than 5 people are gathered

Please note that this means masks or face coverings are required when under your team awning with 6 or more people, walking through the paddock, at victory circle, on grid and pit lane, in the race control building, in facility restrooms, and other situations not explicitly described here. Drivers will not be interviewed and participants will not be videoed or photographed without masks. The series and track reserve the right to stop on-track activity if masks are not worn. Teams should not post any videos or photos of attendees not following this requirement.

SCCA Pro Racing will have three-layer reusable masks available for purchase, but participants should plan to come to events prepared.

The purpose of this document is to identify areas or actions that increase the risk of transmitting the virus between participants and to suggest possible methods of reducing this risk. The document does not and is not intended to identify every point of transmission and every mitigation method nor that following the recommended mitigation methods will prevent virus transmission.

The following protocols will be followed in SCCA Pro Racing controlled areas (trailer, tech, hospitality, timing, race control, and registration). Teams are highly encouraged to follow the same protocols in their areas.

- Disinfectant solution and/or wipes will be used in high participant traffic areas to disinfect surfaces between interactions. A list of the [EPA-registered household disinfectants](#) can be found by clicking the link.
- Hand sanitizer (with at least a 60% alcohol concentration) will be available in all areas listed above.

When in doubt, wash your hands and keep your distance.

The CDC and Health Department guidelines such as a minimum 6-foot buffer between participants should be maintained whenever practicable. It should be practiced whenever possible, even within teams.

Restrooms may have limited capacities. Please wait outside if the restroom is occupied. All participants are prohibited from entering the race control room except for series personnel. All series meetings will be held at the SCCA Pro Racing trailer.

If a participant is suffering from COVID symptoms once inside the facility, he or she will be checked out by emergency services at the care center and will be isolated, if necessary. Areas that participant has come in to contact with will be sanitized and contacts will be notified and monitors, if necessary.

Any person who attends this event is required to notify SCCA Pro Racing of any diagnosis of COVID-19 for up to 14 days after leaving the track.

This is an evolving environment and as changes occur, the information will be communicated to the best of our ability via official channels and the track PA.
