

F4 Competitor Advisory Memo

No: CAMF4-2023-008
Date: July 14, 2023
Event: New Jersey Motorsports Park
Subject: Hankook Slick & Wet Weather Tire Availability

Teams & Drivers,

Slick Tires:

Hankook Tire has advised us they will have the standard two sets of slick tires per car available for F4 teams at the New Jersey Event, July 27-30, 2023. These tires will be for use in qualifying and the race events per Article 24.5 of the 2023 Sporting Regulations. Drivers are permitted to use no more than two (2) sets of new dry weather tires for qualifying and races. Per the Sporting Regulations, these tires need to be declared and scanned.

Wet Weather Tires:

Teams in need of wet weather tires for the upcoming event at New Jersey Motorsport Park, need to order and pay for tires in advance from Hankook for delivery at the New Jersey Event. Hankook Tire does not travel wet weather tires on their truck to events. Tires need to be ordered by teams in advance. There is no restriction on wet weather tires, and they never need to be declared or scanned.

Hankook Tire is awaiting confirmation of a shipment of tires which would allow them to provide additional tires at race events and for private testing. We will provide a further update when more information becomes available.

Scott Goodyear
Race Director
