

[M5]

Every room comes with its own unique set of acoustic challenges. And every one of them feels like a cattle prod on your hindquarters – nearly always bringing with it some sort of degradation in sound. Enter our M5. Designed to orient either horizontally or vertically they can sit on stands, rest inside a cabinet or be hand held by two or more small children for a nominal holding fee – with virtually no sonic compromise. Perfect for all home theater channels, front or rear in medium sized rooms.

[SPECIFICATIONS]

System Type:	High-output bookshelf speaker
Configuration:	3-way acoustic suspension with boundary switch
Woofers:	(2) 5.25" polypropylene cone
Midrange:	3" treated paper cone
Tweeter:	1" fluid cooled aluminum dome tweeter
