

[M 6]

Not unlike the Evolution M5, the M6 was designed to orient either horizontally or vertically, to sit on stands or rest inside a cabinet – with virtually no sonic compromise. Where it does differ, however, is in the power-handling department. You see, we upped the horsepower ante (larger woofers and mid-range drivers) that make the M6 a far better match for larger rooms that tend to eat up anything less at will. Not squeaky, but super clean, crazy accurate and below-low distortion for both movies and music.

[SPECIFICATIONS]

System Type:	High-output bookshelf speaker
Configuration:	3-way acoustic suspension with boundary switch
Woofers:	(2) 6.5" polypropylene cone
Midrange:	4" treated paper cone
Tweeter:	1" fluid cooled aluminum dome tweeter
Magnetically Shielded:	Yes
Frequency Response:	61Hz - 30kHz +/- 3dB
Crossover Frequency:	400Hz, 2.3kHz
Crossover Slopes:	12dB LP, 12dB HP
Sensitivity:	86dB (2.83v@1m)
Impedance:	6 ohms nominal
Inputs:	5-way binding posts
Recommended Amplifier	
Power:	50W/ch minimum, 250W/ch maximum
Speaker Dimensions:	8.25" W x 20" H x 10.25" D
Weight:	36 lbs each
Finish:	Anthracite matte lacquer
Other:	Stabilizer for TV placement included
