Are damper attachment points on the body/frame/subframe/chassis/suspension member unaltered?	Yes	No
Are all suspension, steering rack, engine, transmission, differential, and body/frame mount bushings non-metallic and do they attach to the original factory location without modification?	Yes	No
Are all differentials stock or aftermarket replacements contained in a stock unmodified housing/third member with stock or optional ring and pinion ratios available for the specific model, body, and year of the vehicle?	Yes	No
Is the radiator stock or an aftermarket unit where all radiator core dimensions are no smaller than the standard part, mounts to OE radiator mounts, and has fluid capacity and dry weight no less than that of the standard part?	Yes	No
Are all electronic engine controls stock or may be modified/piggybacked, but not replaced?	Yes	No
Is at least one functional catalytic converter present?	Yes	No
Are all bumper covers, facias, body panels, and trim pieces present or supplemented/replaced by allowed protective equipment?	Yes	No
Are all front seats stock or aftermarket units sufficiently large and strong enough to be capable of adequately accommodating an adult?	Yes	No
Are all stock interior items other than the front seats present and unmodified other than for the purpose of fitting around an allowed rollbar?	Yes	No
Are all items that are not specifically allowed by the current rulebook or referred to as unrestricted of the manufacturer's specification?	Yes	No

Explain any of the No answers above and note any other modifications or deviations from the stock equipment:
