Class Ambassador's Briefing

2026 Mission Foods SCCA National Championship Runoffs

Well, here we are, the SCCA Runoffs championship races. It has been a long road to get here but I'm looking forward to some excellent racing!

I won't bore you with all the redundant (and repeated) info from the Super Tour season, so here are a few important highlights:

- → RACE DIRECTOR VIDEO & BRIEFING: Please make sure you watch and review these before you arrive at the track: Race Director Video & Race Director Briefing.
- → SUPPLEMENTARY REGULATIONS: I am gonna bore you with this very important one: please read the supps (especially, among other things, that part about fuel testing). Missing something could hurt…bad: READ THE SUPPS
- → TIRES: Spec Miata (only) can use two sets of dry tires for this event. *Ensure your second set gets marked before you show up on the grid with it!*
- → YELLOW FLAGS: OK, another important one. Penalties for not "significantly slowing" (or worse, passing) under yellow flags will be harsh. Heads up for those flags!
- → SMX DATA UPLOADS: A reminder that you must submit your AIM data within an hour from the end of ***every*** *timed session* (quallies and the race). Failure to do so within an hour means loss of times or positions. AIM technicians will be available to review and give feedback on your data during test sessions; please feel free to upload your data to ensure there's no technical or procedural issues. Come find me if you need assistance or have questions.
- → "ENTRANT": Designate someone on your team as your "entrant" in your registration so they can speak for you if you are not available.
- → SPORTITY: Grab the app if you don't have it. The event password for these electronic notifications is ***26-RUNOFFS***. Have someone on your team use it!

I'll typically be at the SCCA Tech Trailer in Impound my contact info is below. Please reach out if you have questions or need anything. This is going to be a week to remember, I hope you enjoy it!
